**subject**                **May 18<sup>th</sup> ACCP Meeting Agenda**

The Sasaki team is looking forward to participating in the ACCP meeting on May 18. We have spent the past few weeks on campus interviewing a broad cross section of campus members, investigating the physical campus, and reviewing background information. We would like to use this time to review our initial findings to ensure that we are in alignment with campus priorities before moving forward. The agenda for the meeting is as follows:

**1. Review Master Plan Principles and Recurrent Themes**

**Discussion Questions:**

How has the evolution of the campus impacted Babson's current campus form?  
 How will its unique history shape the future?

**2. Explore Babson's Pedagogy and Opportunities for Innovative Learning Environments**

Did we get it right? Do we understand the campus composition?

Do we have the right understanding of how the campus operates?

**3. Investigate Campus Form**

What is the overall impression of the campus?

How do we create a sense of community between the various student populations?

**4. Review Methods of Community Engagement**

What is the appetite for informal collision spaces / spaces that promote spontaneous interaction on campus?
