

**date** June 9, 2011  
**to** ACCP Members  
**from** Sasaki Associates  
**project name** Babson College Campus Master Plan  
**project #** 06675.00  
**subject** June 14<sup>th</sup> ACCP Meeting Agenda

The Sasaki team is looking forward to participating in the ACCP meeting on June 14. The presentation builds upon the recurrent themes reviewed during the previous meeting, and explores ideas related to the use of space, learning environments, and campus form. The agenda for the meeting is as follows:

**1. Explore Opportunities for Innovative Learning Environments**

**Discussion Questions:**

What role will technology play in future teaching and learning environments?

**2. Review Initial Utilization Findings**

What is the appetite for informal collision spaces / spaces that promote spontaneous interaction on campus?

How can we rethink the use of underutilized spaces?

**3. Investigate Campus Form**

How has the evolution of the campus impacted Babson's current campus form?  
How will its unique history shape the future?

**4. Next Steps**

Do we have the right understanding of campus composition?

What is the overall impression of the campus?

How do we create a sense of community between the various student populations?
